TELEPHONE CONVERSATION REPORT

*Rose, Martha
MOD 980633069
11 6
McCoy, Don
9-30-86*

DATE: September 30, 1986
SUBJECT: Docket No. 86-F-0015
FROM: Don McCoy
816-732-6514
TO: Martha R. Steincamp
Deputy Regional Counsel

Mr. McCoy said he received Order and was in a lot of trouble it looked like. He said he was just doing them a favor storing equipment for 30 days (according to them) and now it was still there and he didn't like it. He said it was hard to mow around.

I told him to restrict access to it because our tests showed PCB contamination on some of it. He said no one will come visit him because of the Rose deal - everyone's afraid.

I told him I would call him back by 10:00 AM Wednesday morning and that I might want something in writing saying we had his permission to come on his property to remove the equipment. He said he would do it.

* * *

I called him 10-1-86 and told him to send me a letter listing what American Steel equipment was on his property and that he gave us permission to come there and pick it up to return it to the Holden facility. I said our tests had indicated some PCB contamination, but we hadn't tested everything.
